

**Kings
Security
Services**

Your current alarm system lets you know that there is a security breach but offers **little or no deterrent** in the form of signs, sirens and a blue strobe light. The internal alarm system will activate only after the initial damage is done by the intruder. The physical response which occurs after the incident and after the damage or injuries has occurred is **too little too late**. Relying on physical security is as we all know very doubtful, costly and requires continuous supervision as well as training.

SHOCKING NEWS FOR THIEVES

*Kings Security MONITORED
ELECTRIC FENCE SYSTEM*

PROTECT YOURSELF WITH 7000 VOLTS

Kings Security MONITORED ELECTRIC FENCE SYSTEM

...offers a product which is very successful in other countries ie: Australia, New Zealand, United Kingdom, Zimbabwe and many other countries in the world.

The monitored electric fence system offers the following benefits:

- Very strong deterrent.
- Physical repellent.
- Activates the alarm before any damage occurs to your property.
- Communicates the alarm condition; any attempt to breach the security which occurred to the location nominated by you ie: guard house or monitoring station.
- Can be interfaced with security lights ie: alarm activated - lights come on.
- Can be installed in conjunction with the CCTV system and will allow you to view the area which is under alarm instantly.
- Monitors the whole fence line at all times.
- It is not affected by normal weather conditions.
- Does not discriminate or select; activates the alarm and repels all unauthorised entry attempts.
- Any attempt to tamper with the system will cause an alarm condition, even in day mode.

The **Kings Security** Monitored Electric Fence System is available to you without any capital outlay.

An agreed upon low monthly fixed charge will allow you to enjoy the benefits of this unique security system and offers you peace of mind, as we are fully responsible for the operation, repairs and service of the system.

The monthly charge includes:

- All equipment.
- All installations.
- All service.
- All repairs and replacement of the parts (damage caused by client not covered).
- Upgrade of system when new technology becomes available and replacement is required.
- 24 hours, 7 days per week, monitoring of the system if required.
- Battery back-up.
- Full training for staff, system is user friendly.
- Full control and record of access.
- Fixed and budgetable cost for up to eight years.
- Hassle-free 24 hour security.

The win-win concept offered by the **Kings Security** Monitored Electric Fence System makes you the winner.

- We invest in you our customer by purchasing the equipment required and installing it, as well as by taking the cost of the service and repairs during the term of our agreement.
- You have all the benefits listed from day one without any capital outlay and at the fixed price.
- By installing better quality equipment you enjoy the benefits and we reduce our ongoing cost of repairs and replacement.
- You can invest the intended cash purchase outlay in the bank or your business and further maximise your profits.

The great Tax Benefits offered by this rental system will further reduce the cost of your security.

The cost and level of security offered by the **Kings Security** Monitored Electric Fence System when compared with the cost of any other system or a guard is the reason you should contact us now.

We will custom design a system to suit your location and requirements and offer you an obligation free quote.

The **Kings Security** Monitored Electric Fence System is responsible for a massive reduction in break and enters and our ever growing list of satisfied clients would be only too happy to verify the benefits of an electric fence.

Your security is our priority
